

CoCo 123

January, 1996
Volume XVI, Number 1

The Ex-President's /term

by Eddie Kuns

Welcome to the first issue of our newsletter in '96. I hope everyone had wonderful and safe holidays, and happy new year! I am handing the reins over to Rob Gibons next week, so I would like to use this last column to express my gratitude at being the president of Glenside for the past year. I appreciate the trust put in me. I wish Rob the best, and will be behind the scenes helping where I can.

I learned a lot about delegation during the last year – it takes more time than I thought it would. I couldn't have kept the club going without the hard work, dedication, and love of so many other club members; I couldn't have done it myself. So thank you, everyone who helped, those of you who wrote, who showed up at meetings...it's the club members who make it worth while. Special thanks to Tony, who called to remind me when necessary duties slipped my mind. (Editor's note: Tony's good at that.)

And I'm not going away! Although I will not be club president this year, I am still an officer, and I will still be involved as much as I can. You'll see me again at the 'fest this year—smile when I point my camera your direction! :) (Photography has become my *second* most expensive hobby in the last year. Guess which one is first?) And I miss the occasional meeting, remember I'm trying to graduate, but I am not going away.

At the December club meeting, we held elections for 1996 club officers. I would like to congratulate all of the new officers:
President: Rob Gibons

Vice President: Tony Podraza, Eddie Kuns, and Sheryl Edwards

Secretary: Paul Knudsen

Treasurer: George Schneeweiss

Plans for the CoCo fest in April continue – we hope to have another wonderful show, and hope to see all the familiar friends and new faces as well. Until then, take care and best wishes.

While I am speaking about the 'fest, I would like to remind you all that this club only goes as far as its members help it do so. By this, I mean we need to hear from club members about what they want the club to do, and without the involvement of club members in club activities (planning and staffing club events, helping with the newsletter, showing up at meetings and voting at elections, etcetera), the club will not go on. Please consider offering to help. If your time is limited, then we may be able to find a task that fits your limits. The more people who are involved, the less time each person will need to offer.

A final reminder ... the Chicagoland area will gain two new area codes in 1996. The (708) area code will split into (708), (630), and (847). I imagine this is happening elsewhere in the United States as well, so if your area code changes, please do let us know. (AND tell the Editor, especially you OFFICERS!)

Thank you, everyone, and best wishes for 1996.

CoCo 123 Information

The Glenside Color Computer Club of Illinois is a not-for-profit organization whose members share an interest in the Tandy Color Computer. The CoCo 123 is the official newsletter of the Glenside Color Computer Club. The Glenside Color Computer Club of Illinois has no affiliation with Radio Shack and/or the Tandy Corporation. The opinions expressed by the authors of the articles contained within this newsletter do not necessarily reflect the opinions of the Editor, the Executive Officers, or the actual club membership.

We are committed to publishing a minimum of four issues and a maximum of twelve issues per calendar year. For a fee of \$15.00, for January through December, you can become a GCCC member with full membership privileges. Send your dues to:

GEORGE SCHNEEWEISS
RR #2 Box 67
Forrest, IL 61741-9629

Here is a list of the 1996 Executive Officers and how to contact them. The club has four strong SIGs, Tandy Color Computer 1, 2, 3, and OS-9. If you have questions concerning these computers or OS-9 call one of these officers.

POSITION	NAME	PHONE	PRIMARY FUNCTION
President	Rob Gibbons	It's a secret	The buck stops here
Vice-President	Eddie Kuns	708-820-3943	Meeting Planning, etc.
Vice-President	Tony Podraza	847-428-3576	" "
Vice-President	Sheryl Edwards	708-344-5632	" "
Secretary	Paul Knussen	So is this one	Records and Reporting
Treasurer	George Schneeweiss	815-832-5571	Dues and Purchasing
Editor	Mike Warns	708-827-9561	Newsletter coordinator
Telecom	David Barnes	847-587-9820	Club BBS SysOp
Printer	Dennis Devitt	708-829-2018	Newsletter Exchange

CoCo 123 Contributions

If you would like to contribute an article, upload a file to the Newsletter Submissions section of the Glenside's Cup of CoCo BBS. Ditto for ads and news about your group. Please include a name and an address or phone number. If you would rather submit your article on diskette, they can be accepted in ASCII form and unformatted in the following formats:

RS-DOS 5-1/4" SSDD, 35 tracks
OS-9 5-1/4" SSDD, 35 tracks
MS-DOS Any standard format

Mail your articles to:

Mike Warns
31 South Edgewood Avenue
Lombard, IL 60148

Submission deadline for the CoCo 123 is the 15th of each month. Articles submitted after the deadline will appear in the next issue.

CoCo 123 Newsletter Exchange

The Glenside Color Computer Club of Illinois is pleased to exchange newsletters with other Color Computer or OS-9 user groups at no charge. Send your newsletter to:

Dennis Devitt
21 W 144 Canary Road
Lombard, IL 60148

Reprint Policy

If you desire to reprint any articles that appear here, please provide credit to the author and this newsletter.

We encourage your user group to copy this newsletter and distribute it at your regular meetings to your members free of charge as we believe that this will encourage better meeting attendance. If you are a user group that feels as we do, please let us know and send us your newsletter. We will then distribute it to our members and keep our attendance up.

Glenside Club Meetings

The Glenside Color Computer Club meets on the second Thursday of each month from 7:30 to 9:30 PM at the Glendale Heights Public Library. A social get-together always occurs afterward at the Springdale Restaurant.

Future meeting dates:

February 8, 1996
March 14, 1996

Editor: Mike Warns
Design, layout, graphics: Walrus House Enterprises

A special tip o' the hat to Dave Barnes and BARSoft Publishing, whose masthead page has been, uh, more than an inspiration for this issue's.

Meet the New President!

by Robert Gibons

Greetings to all members of Glenside Color Computer Club! I'm Robert Gibons, the new President of your club, and Eddie (our illustrious former President) wants me to tell you a little about myself. I was born in a log cabin and later moved to the great state of Illinois...no, sorry, that was some one else! Anyway I am from Illinois, born, raised and educated.

My first Color Computer was the first one in my local Radio Shack store, I had gone in, interested in a Model 1 to help me learn something about computers and programming and the clerk though I might be interested in this newer one. It was gray, had 4k of memory and worked with a tape recorder and TV (a color set if you had one) and seemed a better deal (I could add to it as my finances permitted). So taking a small loan (yes I actually had to finance that first purchase) I got it. My first monitor was a small black and white portable TV. Program and data storage was supplied by a tape recorder that had been used to record lectures at college. Soon 4k became 16 then 64. The tape drive was later replaced by first one then two disk drive. A color TV was added about the time the Color Computer 2 hit the stores. The "2" looked good, but not as good as actually seeing my work in COLOR!

My main interest was programming, first in BASIC, then assembly, and for that my old gray CoCo did just fine. Adding and upgrading when I could afford it, eventually I assembled my present system, a 512k CoCo3 with a CM8 Color Monitor and a 60 meg SCSI hard drive running under OS9 Level III

Over the years, support for and information about various systems has changed. At first support was through Radio Shack. Then various magazines, Hot CoCo, Color Computer Magazine, Rainbow etc. When the last of the Rainbow sponsored Fests was held I decided it was at last time to join Glenside. I had known of Glenside from their booth at the Fests, but I

didn't think I had the time to attend meets and was reluctant to join just for the sake of joining. Now I felt I had to in order to keep in contact with other people still using the same type of system I used. Not joining until then was a major mistake. Here was a source of experience and information I had been missing out on, as well as a GREAT group of people that are now Friends. I have been an active member ever since and seldom miss a meeting.

My interest in computers formerly restricted to learning and bettering my skills as a programmer have been widened by the interests of other members and the various demos presented at the meetings. For this I thank you one and all. I have ended up using (and owning) other computers, I presently run the CoCo3 emulator on such system, but my first love (in computers) is still the CoCo.

Brian introduced us to his MIDI/RS-232 port project in the March, 1995 issue. Let's see...

What's News With the MIDI/RS-232 Port?

by Brian Schubring

Well it's been a fast moving year, with lots of things happening. Atlanta '95 has come and gone, and Mike Carey & myself put on a MIDI seminar/show, featuring the CoCo 1, 2 & 3, and several different programs. It was really a good time with all the music and info that was presented by Mike Carey. What was really fun to do was to provide a sound system between Mike and myself that would rock the house. Two main HIGH POWER AMPS, one for the 5 speaker surround system, and the other for the SUB Speaker System. All in all, it provided all with great sound and a few raised eyebrows.

Since then I have finally figured out the addressing (with FEWER chips than I thought), so I can ADD the RS-232 port on the same

Continued on page 4

board as the MIDI-PAK and have it addressable as either T2, or T4 with just ONE jumper. Hopefully, I should have at least a prototype if not the actual boards available for the '96 Chicago, CoCoFEST, to be held in the Elgin Holiday Inn. The actual times & dates will be posted elsewhere in the newsletter and on BBS's around the country. Yeah, I know you've heard it before, but this time I have the time to do this thing and do it right.

Until next time

Editor's Disclaimer:

I have no idea if the prices quoted in this or any other article are still accurate. Between my <ahem> leisurely publication schedule and the fact that nobody goes back and updates their submissions, well, suffice it to say that "prices are subject to change without notice."

October 1995 Board Meeting

by Eddie Kuns

Here is a "to do" list for the next 'fest, and names assigned. (*) means discussion on this topic was delayed to the next BOD meeting, which is currently assigned to Saturday 18 Nov in Carpenterville at Tony's.

- * Get site reservation [Tony] -done-
- * logo art for tee, etc. [Bob & friend]
- * gather vendor list [Tony] -done-
- * contact vendors, mailing [Tony]
- * contact vendors.
followup calls [club members?] (*)
- * gather ads for show guide
from vendors [Tony]
- * get seminars, "draw
card" (personality) [Eddie]
- * print tickets [Dave]
- * tees [Bob, Tony]
- * mugs (?) [Carl]
- * advertising (BBS, fliers,
mailings, mag. ad) [Tony, Rob] (*)
- * show guide [Carl]
- * floor plan for show guide [Carl]

- * buttons [Chasteen]
- * table rentals [Tom]
- * hospitality room,
"reunion" [Tony, Rob]
- * signs [Tony] (*)
- * auctions [?] (*)
- * incentives for new
members [?] (*)

Deadlines:

30 Nov - mail vendor packets to vendors (hopefully earlier)

15 Jan - follow-up to vendors; more follow-up to vendors periodically after this, as necessary

2 Mar - deadline for vendor paperwork and ad info (size)

16 Mar - final deadline for money from vendors and for camera-ready ads

Other decisions made:

We don't have time for a contest for a fest logo. We do have time to start planning one for the NEXT 'fest, in '97.

Seminar idea: "Meet the vendors" 1 hour before show opens. Chance for vendors to talk about new products and what they have.

Table cost: \$35, \$30 for GCCC members

Ticket for weekend (or one day): \$10, \$5 for GCCC member

ReUp Membership at show: \$10

We will need a terminal with POS at the door.

October 1995 Club Meeting

Leif Ericsson Day
October 12, 1995

By Tom Schaeffges

With a few board members missing the meeting went on, Mike Knudsen taking notes for Secretary Sheryl Edwards. We came up with a count of 15 members, counting board members attending. The meeting came to order at 7:39

Since our beloved president couldn't make it this month, our Vice-President Rob Gibbons conducted the meeting. We started as usual with the introductions of the people that attended.

We then went right to business, that is, old business first.

First, the club's library. The club library is now on disk and ready for any and all to read. You can find it on both the Cup of CoCo BBS and the Glenside West BBS or call one of the board members listed in the front of CoCo 123 and ask for a copy.

Second, Glenside's Annual Picnic, 27 attendees; the food was great, the weather was a bit cold, possibly why the picnic broke up a little earlier this year, but all who came had an good time.

Third, Atlanta CoCo Fest; we had three representatives from Glenside head down this year, Tony Podraza, Brian Schubring, and Paul Jerkatis. They filled us in on what happened and gave us their impressions of what they thought of the fest this year - all positive. Tony told us about 3 new memberships and the other renewals and how the P. O. S. [Point Of Sale] system worked great this time.

Fourth, Grayslake Ham Fest; Tony had set up a table, brought his system down for people to see and handed out some newsletters and then a problem, the system died the second day. Now this was the weekend just before Atlanta and now a rush to find the problem. Rob Gibbons and I were supposed to meet Tony at his house during that week to help prepare for the Fest. Rob showed up on time, I was a little late, but did show up in time to find Tony flying around back and forth between helping Rob in the garage and Brian Schubring in the house transplanting a motherboard on Tony's system. Well, all seemed to work out alright until we found the damaged boot with a bad kernel and no commands in the right place. In the end, all worked out, however.

New Business - First, Brian is working on a midi pak for all to get their mitz on. It's still in the laboratory, though Brian is hopeful that he will have a working prototype soon. Second, talk of incentives to try to get members to make it to

the meetings a little more often. MORE DEMOS?? Give us your input. Third, nominations were held and the results are in (per approval by those nominees that weren't present):

President:

Tony Podraza
Rob Gibbons
Sheryl Edwards
Brian Schubring

Vice-President:

Eddie Kuns
Mike Knudsen
Gene Brooks
Tom Schaeffges
Carl Boll

Treasurer:

George Schneeweiss
Sheryl Edwards

Secretary:

Mike Knudsen
Sheryl Edwards
Gene Brooks

There you have it!! The nominees, Please show up next month to vote on the person YOU want to run YOUR CLUB!!

November, 1995 Meeting

by Bob Swoger

The meeting began at 7:45 PM after the arrival of some late entrees due to, not only great tasting, but plenteous food at the Springdale Restaurant.

President Eddie Kuns gave a report of the special CoCoFEST meeting two weeks earlier. Of note was the fact that there wasn't enough time for a fest T-shirt logo contest and so Bob Swoger was given the responsibility of finding a new logo with the help of Tony Podraza and Jim Johnson. Table and admission prices shall continue to be low again this year as the fest still continues to pay for itself.

Notably absent was our Secretary, Sheryl Edwards, due to work commitments as her boss and past president Brian Schubring was recovering from surgery and also missing. Because our secretary was missing, we did not have a list of the nominees for our scheduled election. The election was therefore, necessarily, postponed until December. Filling in for Sheryl was yours truly, Bob Swoger.

The business meeting adjourned at 8:15 PM, YES, EIGHT-FIFTEEN! and we began the demos. The first demo was a program called CoCo Registry. Do you remember answering one of those club questionnaires that asked not only your name, address and phone number, but also more details about your computer setup and other personal interests? The CoCo Registry puts all this gathered information about CoCo users into a single program that provides search routines using a template you create from prompts and reports all the information gathered on those users. Not only is the screen layout very good and colorful with the names of the users highlighted separately in one window while the total information of address and phone number appears in another window using plenty of color to show off the CoCo's capabilities, the program also zooms in tighter on those windows for easier reading by those users that have been enjoying their CoCo's for over 15 years, now.

Perhaps the database for this program will be updated by a Glenside Champion who will gather the necessary information about all of the Glenside members. This would improve the attractiveness of this program to be a better selling product for this vender.

The next demo was a TOSHIBA T2000SX 386 16 MHZ MSDOS machine running an emulator. Paul and Eddie Kuns could hardly be torn away playing old games from a list that included ARKANOID, ADAstra, DOOM-DARK'S REVENGE, DEATH CHASE, JETPAC, POGO, TEMPEST, PAPERBOY, VIRUS, SAM STOUT, FRED, HOBBIT, KONG, and FREEZBEE just to name a few. We noted that there are some short comings with emulators which include sound and joystick operation that doesn't necessarily act as well as the original machine.

Also noted is the difficulty of moving these programs from your original storage media to a MSDOS hard drive. We also noted the fact that unlike many machines like Atari, TI and Commodore that our beloved CoCo was made so well that the machines are out living the owners making emulators less important to our users than the emulators of other platforms.

The third demo was a quick and easy menuing system called LogiCall running on the same computer that ran the emulator. This program provides a menu when the computer is booted up. It allows launching of programs by pressing only a few keys and <ENTER> which proved far faster than launching programs with the use of MSDOS or windows. It is based around user maintained menu boards and user maintained simple batch files. It also contained a collection of public domain utilities, some familiar to OS9 users. As this program is presently in the beta test phase, several members took a copy home for test.

The demos were over at 9:30 PM.

PLEASE NOTE THAT WE HAD AN HOUR and FIFTEEN MINUTES OF DEMOS! It was suggested at THE MEETING AFTER at the Springdale Restaurant by Dave Barnes that a meeting with more concentration on demo's might get more of the membership out to meetings as our meeting attendance has fallen below 25 for the last two meetings. Also noted by Rich Bair and George Schneeweiss was the fact that we had 100% turnout at the restaurant meeting!

***Share your
favorite programs
in a demo at the
next meeting!***

CoCo Fest Committee

Meeting Minutes

The November 18th meeting began at 8:20 PM following the pizza dinner. The minutes of the previous October 18, 1995, meeting were read by Sheryl Edwards.

The first item of business was the logo for the cover, tees and buttons. No work had been done on the logo yet but Bob received ideas from the group at this meeting. A CoCo setup was a possible idea for a logo with some message 'ON THE SCREEN'.

Bob Swoger reported that things are a bit different in regards to getting the tees in that Annette no longer works for PROMAC. Annette still knows who to get prices from to keep the cost low. Annette needs to know the quantity needed.

A current roster shall be at the POS terminal at the door.

Dave Barnes has confirmed that he will print the tickets.

Carl Boll has confirmed that he will take care of the mugs.

John Chasteen needs the logos for buttons by the first of January.

There shall be no requirement for advertising for auction items. Tony, Rob and Tom shall scrutinize what items are to be auctioned so that no vendor will lose a sale. Mike Knudsen and Sheryl Edwards shall again cover the auction.

Clarification was made about new membership and re-ups. A plastic bag will be prepared for the incentive that contains such things as news letters, pens, key rings, new member disks and other such items. If the membership is new—he gets it all. If a late paying old member—pull the new member disk and maybe the newsletters—he probably has them already. If the person wants membership until end of 1997 - collect \$25 instead of \$10. The current member can extend membership to end of 1997 and get the bag with newsletters and disk deleted. The new and re-up paid \$10 for

fest ticket - The old member paid \$5 for that ticket. [The \$25 dollar suggestion was voted down, we will only do the \$10 deal.]

Sheryl suggested that Disney type games the club has left could be given to those with youngsters 12 years old or less.

Table for the fest were the next item of business. Tom needs help in that he is a vendor and also has to get the tables moved. Two trucks are needed, Tom has one, Sheryl will supply the other. Volunteers are needed and must sign up to be present at the proper time to get the tables from the truck into the inn and back to the truck again.

Rob will peruse public service radio announcements for the fest.

At the October meeting Bob suggested a pre-fest get together of the vendors and attenders so that the vendors might introduce themselves and tell the public of the special goodies that they brought to delight the buyers. Tom gave a vendors point of view of why this might not work. Eddie came up with an idea to pass a microphone around on the floor to accomplish the same end. This idea was considered more acceptable. Event would begin after there was no more line of people trying to get into the fest. In this regard there would be no seminars started until one hour after the fest starts - 11 AM.

Discussion was given to the hospitality room. The famous corner might provide space for this activity if Rob and Tony are not pleased with the room at the inn. All that would be needed would be chairs and water and maybe TV. Goodies would be nice but not necessary. Maybe a CoCo setup could be provided to try out some software—no piracy, please! Further discussion on this topic will pick up again at the next meeting.

OS-9 is to be printed and talked up more as there are folks that feel that we have not done this enough in the past and it should be known that great and important strides have been made for the OS-9 user.

In regards to signs, Rob said he was unable

I have never used a Tandy MC-10, in fact I have only seen a few of them, but I love virtuous small computers. Rogelio, who seems to be doing more than anybody to keep this charming machine doing useful work, explains these virtues at the end of his article.

Rogelio will cover the CoCo 2 & 3's expansion port next issue

Micro Color Computer [MC-10] Expansion Port

by Rogelio Perea

This document contains the basic information about the expansion port of the MC-10. The port is of the standard 34-pin style, where you can use a connector and cable like the ones used for floppy disk drives. The MC-10's expansion port is said (by Tandy on the MC-10's Service Manual) to be capable of being used with external memory modules or ROM software modules; since the MC-10's introduction and demise, only a 16k RAM Pak appeared in the market, at least, from Tandy's side.

All the CPU related signals are present on that port, so for *that* special project you have on hand, almost anything can be hooked over in there. I also provide at the end of this document the rather small memory map supplied with the MC-10 Service Manual. Further information about the MC-10 and its ins and outs will be posted on Compuserve, the Atlanta Computer Society BBS (ACSBBS) CoCo SIG and on Huff & Puff BBS CoCo Cabana section (Phoenix AZ). Also, any new notices regarding these postings will be left on FidoNet's CoCo_echo and on bit.listserv.coco as they come around. With luck, the information will also be made available on PRINT on any CoCo related newsletter still alive (try Glenside's CoCo~123).

The I/O Connector on the back of the MC-10 has the following assignments:

PIN	SIGNAL NAME	DESCRIPTION
1	GND	Signal Ground
2	GND	Signal Ground
3	D0	CPU Data Bit 0

4	D1	CPU Data Bit 1
5	D2	CPU Data Bit 2
6	D3	CPU Data Bit 3
7	D4	CPU Data Bit 4
8	D5	CPU Data Bit 5
9	D6	CPU Data Bit 6
10	D7	CPU Data Bit 7
11	R/W*	CPU Read/Write Signal
12	A0	CPU Address Bit 0
13	A1	CPU Address Bit 1
14	A2	CPU Address Bit 2
15	A3	CPU Address Bit 3
16	A4	CPU Address Bit 4
17	A5	CPU Address Bit 5
18	A6	CPU Address Bit 6
19	A7	CPU Address Bit 7
20	A8	CPU Address Bit 8
21	A9	CPU Address Bit 9
22	A10	CPU Address Bit 10
23	A11	CPU Address Bit 11
24	A12	CPU Address Bit 12
25	A13	CPU Address Bit 13
26	A14	CPU Address Bit 14
27	A15	CPU Address Bit 15
28	E	Main CPU Clock (0.89 MHz)
29	SEL*	Input to Disable Device Selection
30	RESET*	Main Reset and Power-up Clear Signal to the System
31	NMI*	Non-Maskable Interrupt to the CPU
32	+5v	+5 volts (250 mA)
33	GND	Signal Ground
34	GND	Signal Ground

All the signal names ending with a * mean that the signal is Active-Low; that is, a zero (contact with GND) is required to enable that particular signal. The (brief) memory map for the MC-10 follows:

HEX Address	Description
0000	Data Direction Register for Keyboard Lines

0001	Data Direction Register for miscellaneous I/O
0002	Keyboard Output Lines
0003	Miscellaneous I/O Data Register
0004	Not Used
0005	Not Used
0006	Not Used
0007	Not Used
0008	Timer Control and Status Register
0009	Counter (high byte)
000A	Counter (low byte)
000B	Output Compare Register (high byte)
000C	Output Compare Register (low byte)
000D	Input Capture Register (high byte)
000E	Input Capture Register (low byte)
000F	Port 3 Control and Status Register
0010	Not Used
0011	Not Used
0012	Not Used
0013	Not Used
0014	RAM Control Register
0015-007F	Not Used
0080-00FF	RAM Internal to the 6803
0100-3FFF	Not Used
4000-8FFF	16k RAM (4k - 20k used)
9000-BFFF	16k I/O Slot (Keyboard and VDG control)
C000-FFFF	16k ROM (only 8k used)

On a last note, the MC-10's memory map is divided into four 16k blocks using a 74LS155 with four OR gates and two inverters, these providing Device Selection in the MC-10. The first 16k segment is not used externally to the CPU. The next 16k segment is used for System RAM. The third segment is used to read the keyboard and to write to the VDG control register; the final 16k is reserved for system ROM.

Both sections of the LS155 are used so that all of the device selects may be gated with E,

while the CPU write signal for the RAM is gated with a WIN* (window) signal. The disable input to the LS155 are tied through an inverter to the expansion port and to a pull-up resistor. This allows an external device to change the MC-10 memory map. Also, the disable signal for the memory write is ORed with A12 to prevent a complete overlap of the 4k of RAM into the 16k memory map segment.

I believe this information should be valuable to anyone trying to make a particular gadget for the MC-10, or maybe it is valuable to someone just seeking a little more knowledge about this somewhat "obscure" computer that Tandy at one time made available. The MC-10 is an excellent machine on which to do specialized tasks: alarm systems, lighting systems (been thinking of developing such for some heavy metal friends of mine)... while one might argue that a 8088 PC is better equipped, or a CoCo 1/2 are easier because of extras, nothing can beat the MC-10's size and price these days (free?).

More information soon.....

Continued from page 7

to come up with ceiling hangers. Dave will make an effort to come up with something in less than two weeks.

The start and stop times were considered next. As it stands now the show times shall be:

Saturday 10 AM to 5 PM

Sunday 10 AM to 3:30 PM

Brother Jeremy shall have the Sunday hour between 8:45 and 9:45 AM to give more folks opportunity to come to his service.

Sunday 3:30 PM is to be the official close of the show with no one being kicked out but for those staying around maybe help the vendors pack.

***It's Gonna
